Ayanthi Jayamali

Summary

- Motivated Information Technology Diploma Student at ITUM, University of Moratuwa, specializing in Full-Stack Web Development and Machine Learning / Data Science. Proficient in Python, Java, React, Node.js, Spring Boot, and Relational Databases.Strong background in software architecture design and data-driven solutions. Seeking a Trainee / Junior Software Engineer (ML / AI / Full-Stack) role to build scalable, intelligent digital systems.

Education

Information Technology, *Institute Of Technology University Of Moratuwa* 2023 – 2026
Diyagama,Homagama

Skills

Programming Languages
Java
Python

Backend Technologies
Node.js (Express)
Spring Boot
NestJS

Developer Tools & Methodologies
GitHub
VS Code
IntelliJ IDEA

Frontend Technologies
React
Next.js
HTML
CSS

Databases & Tools
MySQL
REST APIs

Achievements

- I have successfully completed the **Python for Beginners** online learning programme offered by the Department of Computer Science & Engineering, University of Moratuwa (Centre for Open & Distance Learning - CODL).
- I have successfully completed the **Python Programming** online learning programme offered by the Department of Computer Science & Engineering, University of Moratuwa (Centre for Open & Distance Learning - CODL).
- I have successfully completed the **Getting Started with Docker** online course offered by Simplilearn SkillUp.
- I have successfully completed the **Getting Started with Machine Learning Algorithms** online course offered by Simplilearn SkillUp.
- I have successfully completed the **Machine Learning Using Python** online course offered by Simplilearn SkillUp.
- Authored technical articles and code documentation for full-stack software architectures.
- Published and deployed a personal developer portfolio website showcasing web applications.

Project Experience

Hub Lanka – Freight Forwarding Management System, *Full-Stack Developer | NestJS, React, PostgreSQL*

- Designed end-to-end system architecture, Use Case diagrams, and System Requirement Specifications (SRS) documentation.
- Developed backend RESTful APIs using NestJS and dynamic reporting analytics modules.
- Built responsive frontend UI card layouts and components in React using Tailwind CSS.

ResourceHub,

Full-Stack architecture, RESTful API design, React State Management, and Spring Boot static resource handling.

- ResourceHub is a platform built for developers and students to discover, share, and manage study materials, code snippets, and technical guides efficiently.

Customer Management System, *Full-Stack Application Technologies: Node.js, Express, React, MySQL, Postman*

- Developed a comprehensive full-stack web application to streamline customer data management and operations.
- Engineered a responsive frontend using React and built a robust backend RESTful API with Node.js and Express.
- Integrated a MySQL database for secure data storage and utilized Postman to test and validate API endpoints.
